pen. Even if Americans stopped eating meat, the grain that wasn't used to feed the cattle we didn't eat would *not* go to the poor countries, which couldn't afford it anyway. Quite likely it would go to the USSR to feed Soviet cattle. Third, people in the poor countries would continue starving.

What do we do about the population explosion? It would be handy to slip birth-control pills into the poor countries' water, but that would hardly be practical. Dr. Mumford suggests "the creation of an agency modeled on a military organization, with a wartime sense of urgency," dedicated to solving the population problem.

Another solution might be for the United States to tie development aid—except for emergency aid in time of famine—to birth control. We could require that poor countries receiving U.S. assistance set up population-control programs. Our leverage would be the threat to cut off further money if the programs weren't being run to our satisfaction.

Evidence does exist that it's possible for even the poorest nations to succeed at population control. China, for example, cut its birth rate by nearly one-half in just seven years. All that's needed is the will—and the rich nations may have to help with that.

Will world hunger ever be eliminated? "There is always the possibility of progress," answers the USDA's Daniel Shaughnessy. "Better agricultural methods and improved transportation and storage will help considerably. It won't be easy, but the problem *can* be solved."

Until that day arrives, the tenacious comeback story of a South African boy named Mbuyiseri provides a glimmer of hope for future generations. When he was 16 months old, he weighed only ten pounds—about the same as a newborn infant in this country. Mbuyiseri's ribs poked through his parchment-thin skin like the cross-sticks on a paper kite. His head seemed too large for his frail body to support. Hungry eyes bulged from his face. He looked more like a shriveled 70-year-old man who'd been rescued from a Nazi death camp.

Little Mbuyiseri was luckier than most. Near death, he was brought to a Johannesburg hospital. After three months of care the skin hung from his back like a cheap jacket. He still wasn't strong enough to stand, and hadn't learned to speak. But he had gained a pound, was able to sit up and even smiled sometimes. His doctors say that as long as he doesn't catch an infection, Mbuyiseri may survive.

Countless others around the globe should be so lucky. 🐾

WORLD HUNGER

(continued from page 54)

to the needs of their own people should consider Ethiopia's Haile Selassie, Cambodia's Pol Pot, Nicaragua's Anastasio Somoza, Uganda's Idi Amin and the Central African Republic's Jean Bedel Bokassa—all of whom have been deposed. A dictator whose subjects are starving often becomes an unemployed or very dead dictator.

4. *Encourage food self-reliance.* Brazil's economy depends in large part on coffee, Sri Lanka's on tea and Kenya's on cotton. What do these crops have in common? They're grown for export—and cannot be eaten. The foreign-exchange money they produce goes to large landowners (and foreign corporations) in these countries. Ordinary farmworkers receive low wages and have a hard time buying food. Obviously, it would be a better idea if Brazil, Sri Lanka and Kenya devoted more of their fertile farmland to producing food for their own people.

"Not many can become self-sufficient, that is, produce all their food themselves," says the USDA's Daniel Shaughnessy. "But many can be self-reliant, balancing food crops with cash crops so they can grow or purchase their food themselves."

5. *Control the world's population now.* Undeniably, whether or not you agree with such ideas as triage and the "lifeboat ethic," too many people are being born. Dr. Steven Mumford, an authority on population studies, warns, "There is a frightening lack of respect for the world-population problem."

This problem (like hunger) is most severe in poor countries. The people of North America and Europe practice birth control more regularly than anyone else in the world. Those in Africa, Asia (except for China) and Latin America—the very people who need it most—practice it the least.

A major stumbling block is the Roman Catholic Church, which, of course, is dead set against birth control. In the vast majority of Third World nations the Church wields a powerful influence over the poor—who have little else to cling to but a faith in God.

Failure to properly educate the poor is another factor in the population explosion. And unfortunately, it's become fashionable in some poor countries to denounce birth control as mass murder and to suggest that the solution to the world's hunger problem is for people in the rich countries to eat less.

There are several problems with this thinking. First, it's not going to happen. Second, it wouldn't work if it did hap-

**ENLARGE YOUR PENIS TO IT'S MAXIMUM!
HAVE ERECT MEASUREMENTS OF
9, 10 EVEN 12 FULL INCHES!**

The **MACRO-TEN** is the **ONLY PENIS DEVELOPER** you will ever need!

Is the size of your penis bringing you down? Sure, the medical authorities say the size doesn't count, but as long as women have a need to be filled, they will demand the full measure of devotion. And no amount of psychological reassurance will fill the gap between expectation and reality.

Now, with a simple device you can follow in the footsteps of thousands of men who have proven that there is a way to **INCREASE PENIS SIZE and THICKNESS!** The device is called the **MACRO-TEN ELECTRIC VACUUM ENLARGER**. A safe and proven natural way to add inches to penis length and thickness. With the **MACRO-TEN**, you will see yourself grow to dimensions you never thought possible.

HOW CAN THE MACRO-TEN ELECTRIC VACUUM ENLARGER INCREASE PENIS LENGTH & THICKNESS?

Your erection is caused by blood flowing into hollow caverns inside your penis. The caverns fill with blood and your penis grows in size and thickness and becomes stiffer until the caverns are filled with all the blood they can hold. BUT, IF YOU INCREASE THE CAPACITY OF THE CAVERNS BY MAKING THEM BIGGER, THEY HOLD MORE BLOOD and you have a correspondingly longer, thicker penis. Regular use of the **MACRO-TEN** gently urges the caverns to expand — expand — expand — you'll see the astonishing results the first time you use your **MACRO-TEN**. Your penis will grow inside the clear, picture window sleeve. Immediately you'll see just how really **BIG** — how really **FAT** — how **LONG** — how **HARD** and **STIFF** your own penis can get! And after regular

sessions with the **MACRO-TEN** you'll probably find as do most men that these size gains don't go away! They become a part of you to thrill and excite her!

THE MACRO-TEN IS SIMPLY THE MOST POWERFUL ENLARGEMENT SYSTEM YOU CAN PURCHASE ANYWHERE! AT ANY PRICE!

This powerful, totally electric unit (UL approved) is equipped to plug into any wall outlet to give you continuous, even sucking power until you shut it off! Unlike noisy electric vacuum enlargers costing upwards of \$1000 — the **MACRO-TEN** is "quite as a whisper." This sophisticated instrument is by far the state of the art in penis enhancing machinery. It has taken time, money and first-class engineering to produce what many have called the "Rolls Royce" of vacuum enlargers. The **MACRO-TEN** is a finely crafted precision instrument designed to create the vacuum needed to make the male organ **LONG** and **THICKER**. If you are truly serious about penis enlargement — the **MACRO-TEN** will do the job for you!
